What should one ask when buying a leasehold proper

When buying a leasehold property, particularly in the UK, there are several key questions to ask to ensure you understand the implications and potential costs involved. Here are some crucial ones:

Lease length: How long is the lease? Shorter lease can significantly affect the property's value and your ability to secure a mortgage. Leases under 80 years can be problematic and may require an extension, which can be costly. The lease length on this property is 954 years.

Ground rent: What is the current ground rent, and how often does it increase? Ground rent is an annual fee paid to the freeholder. Some leases have clauses that allow ground rent to increase, sometimes exponentially, which can become a significant financial burden. There is no ground rent on this property.

Service charges: What are the service charges, and what do they cover? Service charges are fees for the maintenance and management of communal areas and services. These can vary widely and may increase over time. The service charge for this property is £2228.91 paid 6 monthly (twice a year).
